Meta-Human

AI smart assistant solution that combines Speech-to-Text (STT), Text-to-Speech (TTS), and Large Language Model (LLM) to provide a customer service experience similar to human-to-human interaction. The application scenarios for this product include places that need to provide basic customer support such as airports, hospitals, malls, hotels, banks, etc.

AI Waiter

Natural Language Processing Framework:

The AI Waiter smart ordering system is built on a Natural Language Processing (NLP) framework, enabling its AI to respond to customer needs.

AI Recognition and Big Data Application:

AI Waiter utilizes AI recognition and big data capabilities to cater to different genders and ages of customers, and based on the different dishes selected, it provides menu recommendations with various nutritional components for customers to add to their orders.

Genius Kiosk 21.5" Self service KIOSK Slim and Versatile, fitting Everywhere

- 21.5" full-flat capacitive touchscreen display
- Sleek and minimalist design.
- Versatile installation options - floor-standing or countertop.
 - Rotatable screen for both portrait and landscape display.
 - Modular design for easy maintenance.
- Ideal for a range of industries, including retail, banking, hospitality, and airports.

Venus Kiosk

21.5" Movable Self - Service KIOSK Slim and Versatile, fitting Everywhere

- A wide range of peripherals are available for self-service applications, including 2D scanners, printers, cameras, microphones, speakers, as well as brackets for EMV payment devices.
- The high-quality touchscreen display allows users to effortlessly navigate menus, make selections, and input information.
- With Wi-Fi connectivity, the device can connect to the internet to access real-time updates, content, and data.

SATURN Series

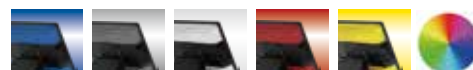

Create a connected experience

- 15-inch bezel-free and ultra slim touch screen
- Multiple system platform and OS for applications
 - 3 optional foot stands for varied purposes
 - Easy to swap storage device
 - Color matching service
- Extensive peripheral connectivity

The optional scan module can read most 1D/2D barcode.

Backplate color option

ARC Series

Space-saving and all-in-one design

- Multiple system platform and OS for applications
- 15.6-inch ultra-slim touch screen
- Revolutionary flip-over display
- Semi-integrated thermal printer
- Modern and stylish design

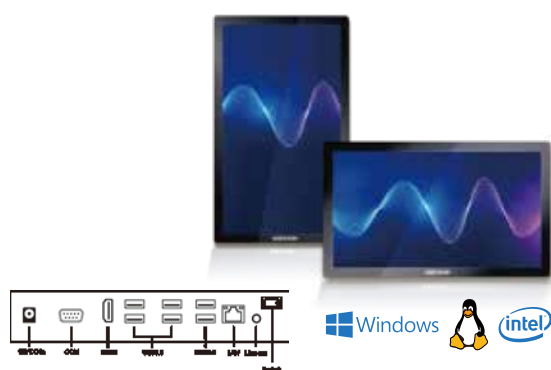

Amber Series

**Versatile, multi-purpose
and secure fanless
touchscreen terminal**

- Intel® 12th Gen Alder Lake processor.
- Whole system purely fan-less design.
- Projected capacitive 10-Point Multi- Touch.
- Dual-hinge design adapts different system application.
- Extensive peripheral connectivity.
- Tool-free modularized Core box design.

Panel PC

10" / 15" / 21.5"

- 21.5" true-flat Full HD LCD panel.
- Projected capacitive 10-Point Multi-Touch.
- Intel® Celeron™ processor for Windows 10 IoT and Linux operating systems.
- With Fan-less system design.
- Supports VESA 100 mounting interface.
- Sleek and minimalist design.

Box PC

Puzzle 2000

**Desktop functionality
with thin-client economy**

- Intel® Celeron™ processor for Windows 10 IoT and Linux
- Rugged aluminum die-casting enclosure
- Low power consumption and Fan-less design & less internal cable
- Easy-Service design
- Wall mount support

Puzzle 4000

**As powerful as a Tower PC,
